## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, drawn to methods for continuous amplification of DNA classified in class 435, subclass 91.2, for example.
- II. Claims 4-17, drawn to an apparatus for continuous amplification of DNA classified in class 435, subclass 288.5, for example.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In the instant case, the method for continuous amplification of DNA presented in Group I can be practiced by multiple materially different apparatus. For example, Kopp et al. ("Chemical Amplification: Continuous-Flow PCR on a Chip" Science. 15 May 1998. Vol. 280, Pages 1046-1048) disclose an apparatus for a continuous-flow polymerase chain reaction (Page 1046, Figure 1).

Furthermore, searching the inventions of Groups I and II together would impose a serious search burden. The inventions of Groups I and II have obtained a separate status in the art as shown by their different classifications. Moreover, the search of the

method for continuous amplification of DNA and the apparatus thereof are not coextensive. A search of the art for methods of continuous amplification of DNA would not necessarily encompass the apparatus of Group II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
